

# Myasthenia Gravis Testing

As your partner in Neurology, Labcorp offers a full suite of tests for Myasthenia Gravis, including muscle specific kinase (MuSK) antibody testing, enabling you to provide confident answers for your patients.

## Individual Test Options:

| Test No. | Test Name   |
|----------|---|
| 085902   | Acetylcholine Receptor (AChR)-binding Antibodies                    |
| 085926   | Acetylcholine Receptor (AChR)-blocking Antibodies                   |
| 505225   | Acetylcholine Receptor (AChR)-modulating Antibodies, Flow Cytometry |
| 504600   | Muscle Specific Kinase (MuSK) Antibodies                            |

## Test Profiles and Reflexes:

| Test No. | Test Name   |
|----------|---|
| 086020   | Acetylcholine Receptor (AChR) Antibodies, Complete Profile<br>This tests for AChR-binding, AChR-blocking, and AChR-modulating antibodies from a single test code.   |
| 165605   | Acetylcholine Receptor (AChR) Antibodies, Complete Profile with Reflex to MuSK Antibodies<br>This tests for AChR-binding, AChR-blocking, and AChR-modulating antibodies from a single test code. If all three are negative, then anti-MuSK is automatically tested as well. |
